Heavy Duty Solid Chain Adjuster Shoe a must for high horsepower Big Twins with chain drive primaries.

Failure of the stock molded plastic HD chain adjuster shoe causes chain breakage and inner primary breakage with related damage to the engine and transmission. Bandit Machine Works offers a heavy duty solid chain adjuster shoe for big Twins. CNC milled from solid ultra high molecular weight Polydure for high strength and wear resistance the solid shoes prevent the adjuster shoe failure prevalent with high horsepower engines. CAD profiled to insure the correct chain path and same as stock fit in the OEM chain adjusters, these are a must for high horsepower Big Twins with chain drive primaries. \$29.95
